DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, are drawn to a radiator mounting system, classified in class 248, subclass 232.
- II. Claims 12-19, are drawn to a fin type heat exchanger, classified in class 165, subclass 50.
- III. Claims 20-23, are drawn to a baseboard heater cover, classified in class 237, subclass 79.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination can be used as mounting means for paintings and the like and the cover can be used as an awning or the like.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
